

AFC

Catalog 2023

Classic

Since 1992, the AFC company is an expert in the manufacture of articles of tableware and utensils in olivewood.

We produce a large choice of spatulas, spoons, salad servers, cutlery, mills, board ans accessories.

Located in the Balkanic peninsula, in the Albanian capital, Tirana, AFC is now a major actor in the tableware sector. Supplier of many brands and wholesaler, our products are exported to 72 countries.

All our wood is taken from an ecologic plantation with whom we have worked since the beginning of AFC.

We receive our raw material directly from the plantation. They sent to us the branches. These branches have a diameter very important.

These branches come from the necessary pruning process of the Olive Trees. There isn't any tree or branch which is cut only for our industry. The main reason of why we can have this wood is to keep the trees healthy to produce more fruit. It's very important for AFC to maintain the biodiversity.

The oliverwood, the perfect deal between Durability and Esthetism.

The veined oliverwood is located in the heart of the trunk and branch.

The heart of the olive trees is an irregular heartwood, that gives to the wood some wonderful characteristics.

The heart is saturated of very dark vein on a wood so brown. Each tree has their own drawing, thanks of this, each product will be unique.

Utilisation advices :

Our olivewood products need to be maintained to insure the maximum lifetime of 10 years. If the advices are not followed, we can't insure the lifetime.

We preconise to the consumer to stock their products out of the light and the sun, in a dry place.

Each product needs to be washed after each using. The washing can be made with a humid sponge or with soap water and rinse with clean water. All products need to be dry after washing.

Products are not made to be washed in the dishwasher.

To have the maximum time life, it's necessary to oil the products almost all the months with a vegetal oil as sunflower.

Fun Facts : environmental certificates.

Our raw material come from a plantation. No tree killed, no wood cut only for our industry and our trees are minimum 100 years old !

Despite this, we are not eligible to the environment labels as FSC, PEFC... .

These labels are made to preserve the biodiversity and limited to the maximum the deforestation.

Because our olive wood is taken from a plantation, only from the necessary pruning process, and for the health of the tree, we are not concerning by the deforestation so, we can't have any label.
